

Eagle Harbor Beach Mains Replacement Project

Community Top Priority

September 15, 2014

PROJECT BUDGET:

Construction:
\$ 4,370,000.00

Funding:
Sewer—\$385,000
PWTF Loan —\$3,985,000.00
Total: \$ 4,370,000.00

PROJECT DESCRIPTION:

This project provides for the replacement of the sewer force mains on the Eagle Harbor Beach from the SR 305 and Wing Point Lift Stations to the WWTP and from the WWTP to the Wing Point effluent outfall line. These existing ductile iron force mains are over 40 years old and have failed a number of times in the past few years spilling raw sewage into Eagle Harbor. The project will replace the existing ductile iron lines with high density polyethylene (HDPE) plastic force mains designed for highly corrosive environments.

The benefit of this project is the replacement project will ensure both system reliability and environmental improvements.

PROJECT SCHEDULE:

Design CompleteMay 30, 2014
Advertise/Open BidsJune, 2014
Construction AwardJuly 7, 2014
Start Construction July 21, 2014
Construction CompleteOctober 2014
